

Crypto and FIAT Trading OTC Process for Voice/Chat Execution

Institutional-grade order matching and settlement services with global coverage.

Crypto and Fiat OTC Voice/Chat Trading Process

DeFinity clients can submit orders via API, GUI, and voice/chat.

All quotes and orders are subject to our Terms and Rulebook: definitymarkets.com/agreement

Please refer to the below page for FIX/REST/WEB SOCKET API trading: definitymarkets.com/api

Please refer to the below page for GUI trading: **definitymarkets.com/infinium**

VOICE/CHAT OTC TRADING

Following the opening of a LIVE trading account, clients can request quotes for crypto symbols and FX trades using an approved electronic communication channel with our OTC desk.

Voice/OTC deals can be submitted by phoning us at the below number:

+44 (0) 20 3290 6580

Clients can submit OTC orders and request quotes via a bilateral private Slack Channel, Telegram, Signal, Skype, or WhatsApp.

Only authorised traders of your firm can submit orders or request quotes.

STEP 1

Contact our team in the chat group indicating what you would like to trade, including size, direction, limit level, etc. Please include settlement preference and blockchain information such as Ethereum, Tron, Solana, etc.

STEP 2

We will provide a price within minutes — we usually require trades to be funded beforehand, so this price will only be indicative (i.e. still subject to market) unless otherwise agreed and marked as being a firm or live price. Refer to steps 3 and 5 for details.

STEP 3

In some instances, we will provide an intraday settlement line, in which case trades are settled on a DVP basis. This service is subject to counterparty profile, trade size, instrument, and time of day.

STEP 4

You transfer the assets you wish to sell to our wallet or bank account.

STEP 5

Once we confirm we have received the assets, we can show a live price, unless a DVP arrangement is in place in which case the previously quoted rate is firm and remains valid until we receive your assets, provided funds clear the same day.

A live price is valid until (i) we state a different price (ii) three minutes have passed (iii) we say 'ref' or 'off'. ('Ref' means the price is no longer tradeable), in which case a new quote must be requested by you.

STEP 6

If you agree to the price, type 'done', or 'confirmed'.

STEP 7

We will then confirm the trade with 'done', followed by the full trade details (e.g. you sell 100 ETH for xxx EUR). Once 'done' or 'confirmed' is stated by both counterparties, the trade is agreed upon and legally binding. The provided rate is an all-in rate.

STEP 8

Subject to receipt of cleared pre-funding, we will initiate the transfer of the assets you bought. In some cases, we will net-settle against your daily NOP line.

STEP 9

We ask for confirmation of receipt of the bought asset to confirm completion of the trade.

STEP 10

We will email you a trade confirmation for your records.

NOTES

For trades including a fiat leg, we provide settlement on a T+0 basis, subject to currency requirements and banking cut-off times of approx. 2.30 pm BST. Trades containing a FIAT leg will be settled the same business day unless otherwise agreed beforehand. Trade sizes above 50m USD notional will typically settle in full within one business day.

From experience, most currencies settle on the same day. We support FEDWIRE, ACH, SWIFT, CHAPS, BACS, and 'Faster Payment System' (UK). However, your bank's incoming wire processing times may differ from our settlement times.

Please refer to **dmalink.com/ssi** for FIAT settlement instructions.

Please be aware that any wallet used for the first time needs to be set up/whitelisted on our side. Your price for a trade is still locked as agreed upon, but settlement may take some time when trading the first time. We use Chainalysis for KYT purposes.

Please refer to our product coverage document titled "Digital Assets and Foreign Exchange Product Coverage" for details on supported crypto and fiat currencies:
